PREPARED FOR CASTROL GLOBAL · YEREVAN, ARMENIA · OCTOBER 2026

KAD Motors: Digital Sales Platform for Castrol Distribution

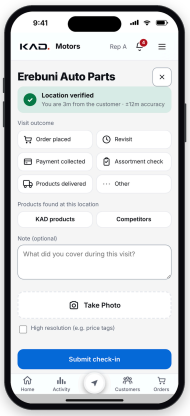

A field app that opens from a link, plus a CEO bot, fed daily from the distributor's ERP workbook. In daily use since August 2026.

The problem

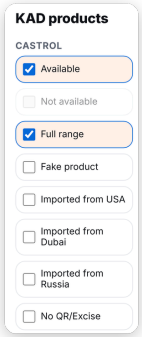

- Orders by phone and chat, re-typed by hand
- No proof of field visits
- Late debt data for reps
- No view of what is on the shelf

The platform

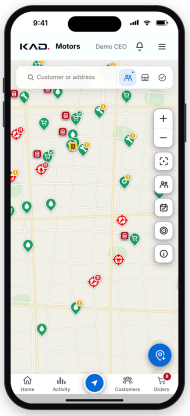

- GPS check-in, photo and shelf audit at every visit
- Orders, tier prices, discount and credit control
- Debt, collections and rep targets
- Dashboards and daily CEO-bot reports

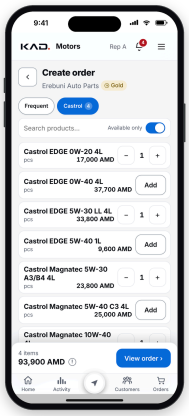

GPS check-in

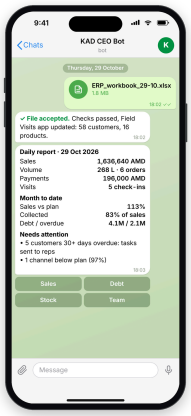

Shelf audit

2026 SO FAR (KAD ERP WORKBOOK, AGGREGATED)

+27%
litres, 1 Jan–8 Oct 2026 vs all of 2025

96%
Castrol volume vs 2026 plan to date

90%
of 2026 sales already collected

230
customers bought in 2026; 159 in the last 90 days

THE 3-STAGE MARKET PLAN IT DRIVES

1 · Presence
70% of customers carry at least one Castrol product

2 · Full range
Complete Castrol product lines on the shelf

3 · Preference
Customers sell mostly Castrol

Our proposal: a pilot partnership

1. **Monthly Castrol shelf and sell-out dashboard for Armenia**
2. **Pilot with 1–2 more Castrol distributors**
3. **Joint review of results after 90 days**

Next step:
60-minute session with Castrol Global

Roadmap: driver & delivery (routes, arrival detection, signature on delivery) · warehouse (picking, packing, live stock) · AI management team (AI deputy CEO with expert agents).
Sources: KAD ERP workbook v2.1.0 (orders to 8 Oct 2026) and v2.0.7 (2025); aggregates only. The platform went live in August 2026, so these figures are its baseline. App screens and the bot report show made-up demo data.
