KAD OS

powered by Castrol

The operating system for a modern Castrol distributor.

KAD Motors, Armenia · November 2026

Demo data

EXECUTIVE SUMMARY

KAD already runs on a complete, AI-first distributor system

VERIFIED NUMBER PENDING
GPS-verified visits per month, before vs after

VERIFIED NUMBER PENDING
Active customers, before vs after

VERIFIED NUMBER PENDING
Castrol presence on audited shelves

Since August 2026 every visit, order, credit decision and payment at KAD runs through one system, with AI that finds problems and drives them to closure.

The ask: make KAD Castrol's showcase digital distributor.

KAD MOTORS

A Castrol distributor that plans to lead Armenia's oil market

Castrol distributor in Armenia

Field, warehouse and finance teams

Customers across Armenia's regions

WHO WE SERVE

- Workshops & garages
- Oil-change points
- Auto-parts shops
- Fleets & car dealers

OUR AMBITION

No. 1 in Armenia's oil market

- Volume
- Revenue
- Reputation
- Technology

Technology is how we win the other three.

THE DISTRIBUTOR CHALLENGE

Most distributors cannot prove what happens in the market

0

verified visits

No proof that field work happens, or where.

Late

orders, credit, stock

Problems surface weeks after the money is lost.

0

outlets with shelf data

The brand owner cannot see its own shelf.

This was KAD before KAD OS, and it is still the norm for distributors in our region.

ONE OS, EVERY FUNCTION

One system runs every function of a Castrol distributor

Field Sales & Visits
GPS check-in, photo, shelf audit

Customers & Map
CRM, routes, coverage

Orders & Pricing
Tier prices, discount rules

Credit & Collections
Limits, debt by invoice, tasks

Targets & Bonuses
Plans, points, scorecards

Analytics
Live dashboards and reports

Executive Assistant
Daily management report

AI agents
AI deputy director, AI analyst

Integration API
Accounting and partner feeds

LAUNCHING NEXT

Delivery & Driver
Routes, arrival, e-signature

LAUNCHING NEXT

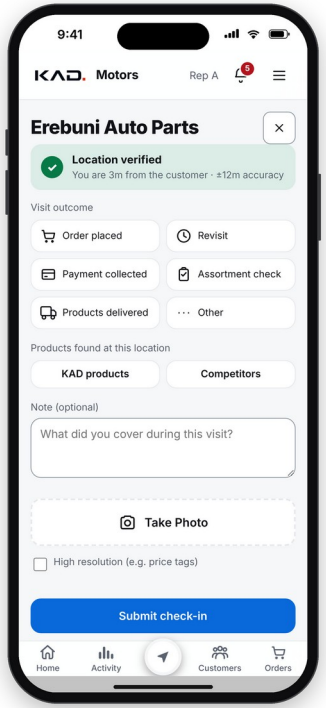

Warehouse
Picking, packing, live stock

LIVE TODAY

9 modules on one cloud database and one mobile web app

A DAY IN KAD OS

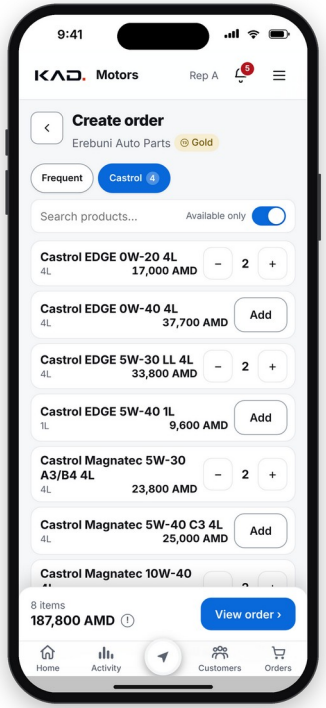

From the shop counter to the CEO's phone, in one flow

09:40

Rep checks in

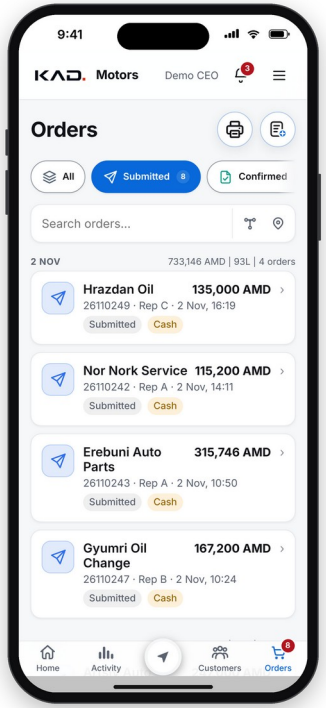

GPS + photo at the outlet

09:52

Takes the order

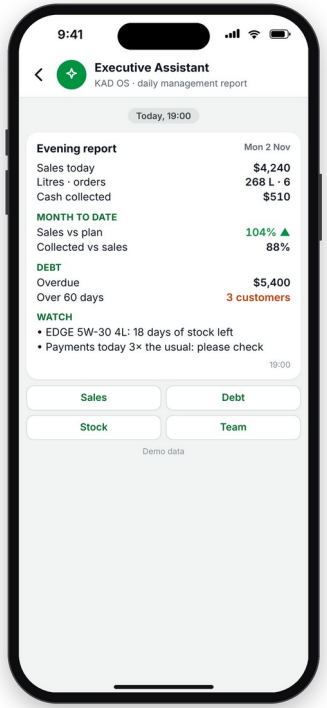

Tier prices, usual basket

09:53

Manager sees it live

Approves in one tap

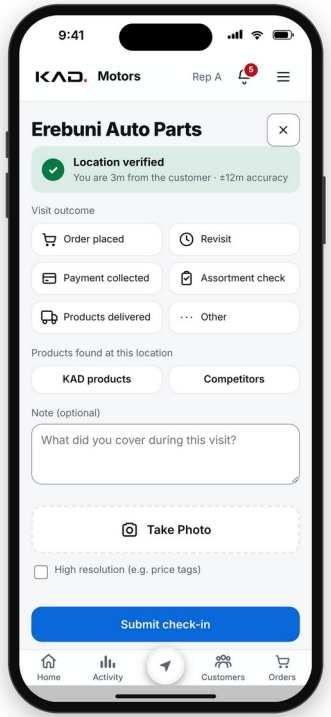

19:00

CEO gets the report

Sales, cash, debt, risks

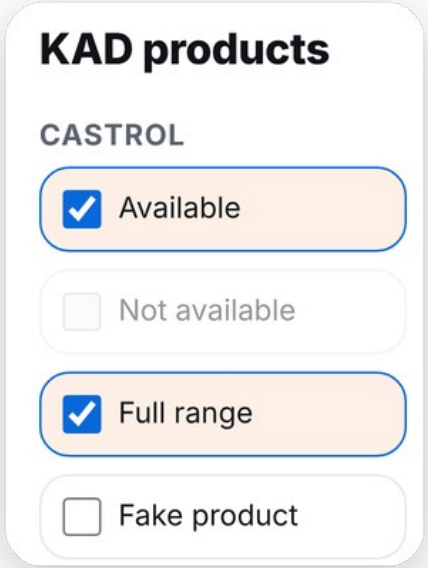

FIELD EXECUTION = MARKET COVERAGE

Every verified visit becomes Castrol coverage data

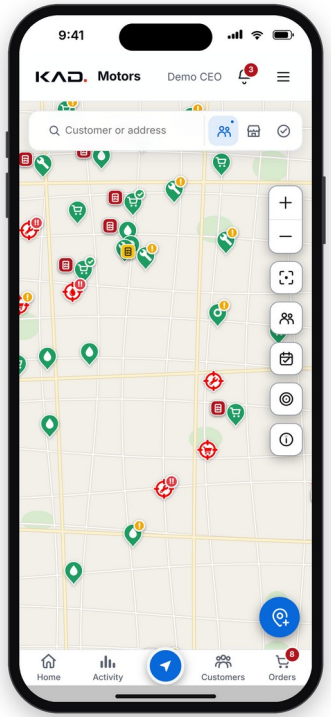

GPS-verified visit

Accepted only within 300 m of the outlet.

Shelf audit, every visit

Castrol present, full range, fake products.

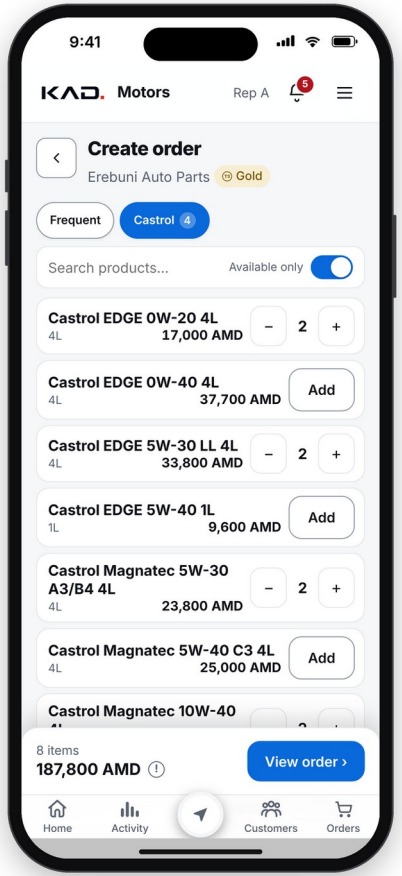

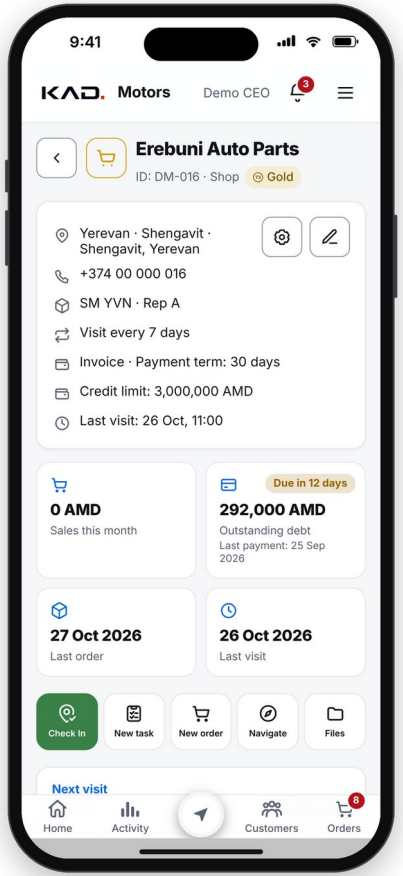

Customer map

Every outlet, its visits and its plan.

COMMERCIAL & FINANCIAL CONTROL

Prices, credit and cash follow rules, not memory

Central tier pricing

Reps never type a price.

Discount rules

Over 3% needs approval; below cost, the CEO.

Credit limits

Over the limit, the order waits for approval.

Debt and collections

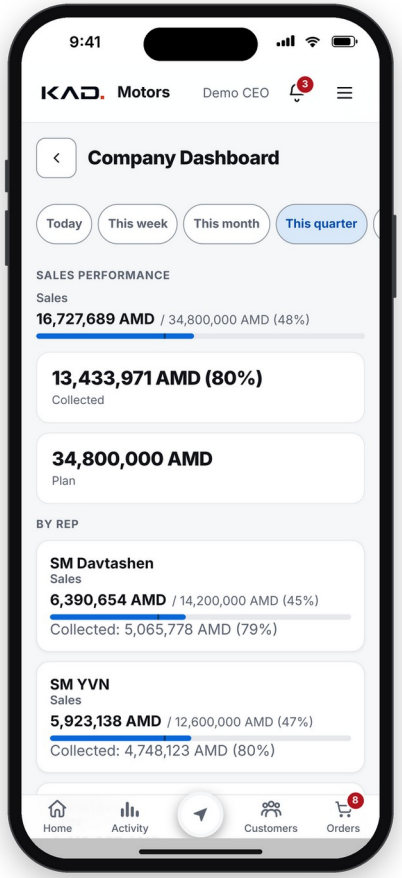

Aged per invoice; overdue becomes a task.

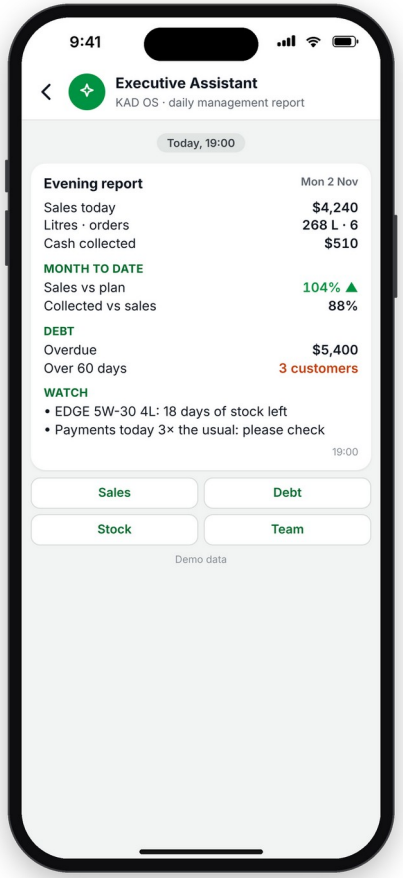

Targets and bonuses

Each rep sees plan, progress and points.

REAL-TIME MANAGEMENT

Management sees the business live, every day

- **Sales vs plan**
- **Cash collected**
- **Visits & coverage**
- **Litres by product line**
- **Debt ageing**
- **Rep scorecards**

KAD OS Executive Assistant

Daily, weekly and monthly reports on the CEO's phone, with the risks to act on.

RESULTS

Results since KAD OS went live

VERIFIED NUMBER PENDING

Verified visits per month: before → after

VERIFIED NUMBER PENDING

Active customers: before → after

VERIFIED NUMBER PENDING

Castrol presence on audited shelves (%)

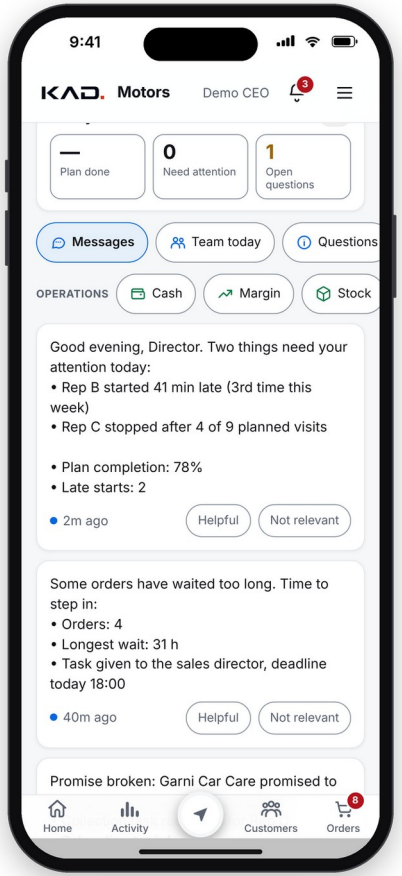

VERIFIED NUMBER PENDING

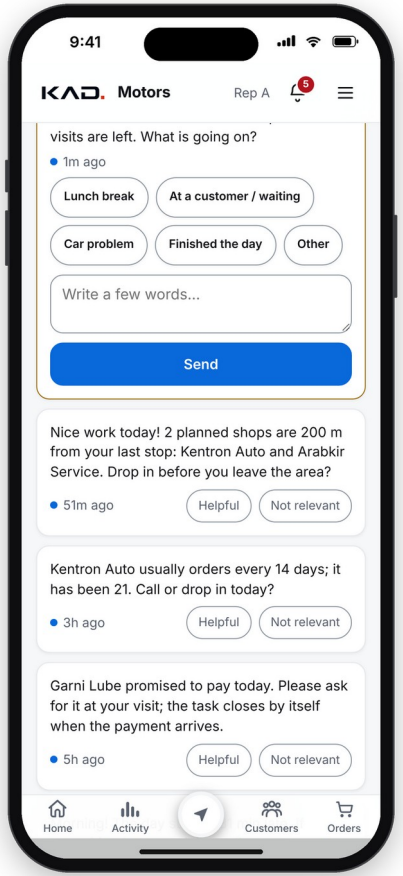

Monthly orders and collections trend, in % and USD/EUR

Numbers come only from KAD OS data (aggregated, no customer detail). Exchange rate to be stated with the figures.

AI-FIRST DISTRIBUTOR

AI finds the problems and drives them to closure

LIVE TODAY

AI deputy director

Watches the field day; assigns, chases and escalates tasks

AI analyst

Answers management questions from the data, anonymised

Self-closing tasks

Debt, reorder and data tasks close when the fix lands

NEXT

Expert AI agents for sales, finance and stock, led by the AI deputy director

Demo data. Left: brief to management. Right: a rep's must-answer question.

GROWING CASTROL'S SHARE

Three stages to win the shelf, each tracked by a KPI

STAGE 1

Presence

70% of customers carry at least one Castrol product

KPI: Castrol presence %

STAGE 2

Full range

Full Castrol product lines on the shelf

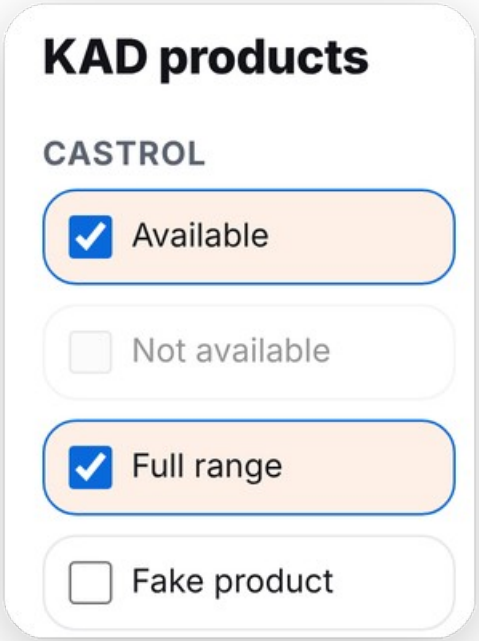

KPI: full-range %

STAGE 3

Preference

Customers sell mostly Castrol

KPI: Castrol-only shelves %

Recorded at every visit (demo)

WHY NOT SAP OR SALESFORCE?

Built for distributor reality, at a fraction of the cost

	KAD OS	Generic enterprise suites
Built for	**Castrol distribution: visits, shelf, credit, cash**	Any industry, configured by consultants
Device	**Mobile-first, any iPhone or Android, from a link**	Desktop-first, app-store installs
No signal	**Works offline, sends when back online**	Mostly needs a connection
Low-end phones	**Speed budgets tested on a slow phone**	Heavy clients
Time to live	**Live in weeks (August 2026), improved weekly**	Long projects with integrators
Cost	**No per-user licences; one cloud server**	Per-user licences plus integrator fees

THE PROPOSAL

KAD OS, powered by Castrol: your showcase digital distributor

WHAT KAD GIVES CASTROL

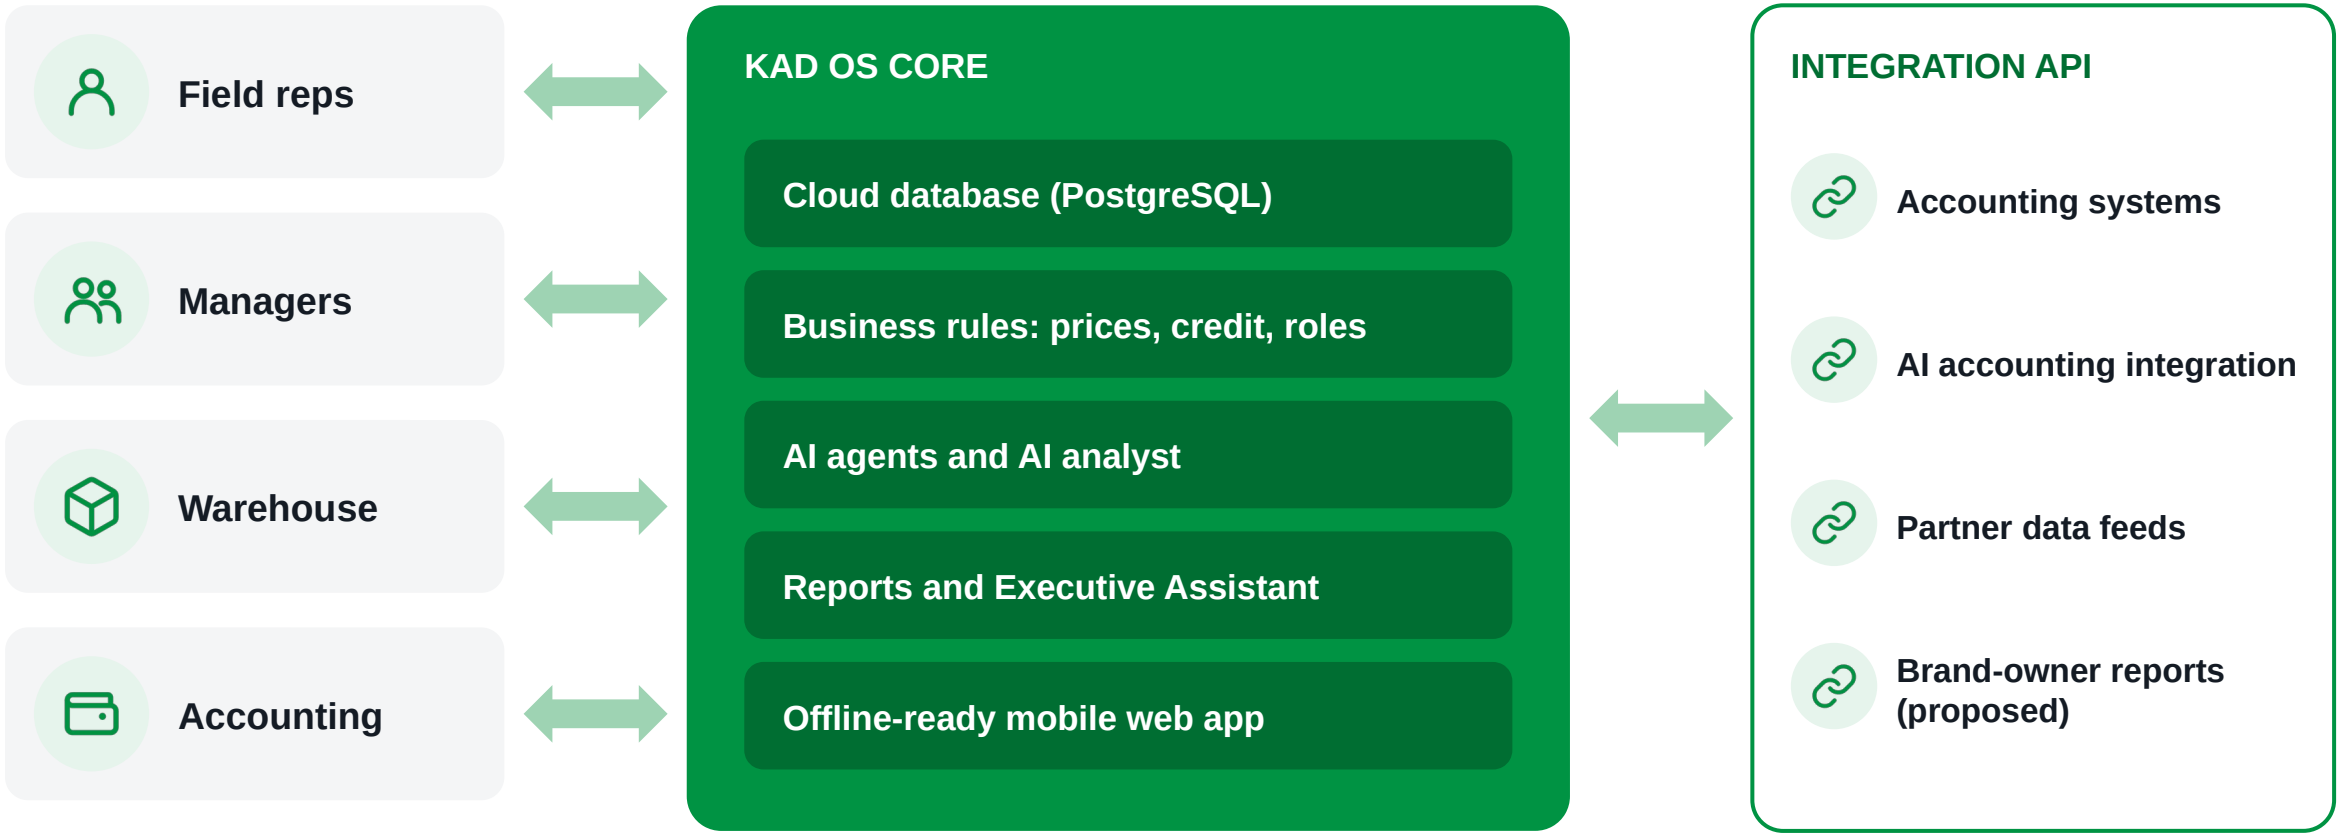

- A live showcase market for Castrol's digital distributor model, with site visits and demos
- Regular anonymised sell-out, coverage and share-of-shelf reports
- A documented playbook and reference case for other distributors
- First-in-line testing of Castrol programmes and launches

WHAT KAD ASKS FROM CASTROL

- Official “Digital Distributor Showcase” status and approval of the “powered by Castrol” co-brand
- Improved commercial terms: pricing tier, rebates, credit terms
- Co-investment and marketing support for the next KAD OS modules and market activation
- Priority supply and access to Castrol product data, training and digital programmes

Next step: a working session with the relevant Castrol teams within 30 days, to agree scope, KPIs and terms.

One core system with a secure integration API

Mobile web app, any phone or PC

APPENDIX · SECURITY & DATA OWNERSHIP

Secure by design, and the data stays with the distributor

Role-based access

8 roles; every rule enforced on the server; a rep sees only own customers.

Encrypted transport

HTTPS only; signed sessions, CSRF protection, rate limits, lockout.

Data ownership

Data stays with the distributor; Castrol gets anonymised aggregates.

Audit trail

Immutable audit logs; order, price and customer change history.

AI privacy

The AI analyst sees codes, never names, phones or tax IDs.

Offline safety

Offline work is queued once and never duplicated.

Quality: about 1,200 automated tests run on every change.

APPENDIX · INTEGRATION API

A secure API connects KAD OS to accounting and partners

Accounting API	Invoices and waybills for confirmed orders, with status back to KAD OS. Token per system, stored hashed; test tokens see test orders only.	LIVE
Accounting data feed	Customers, debt, sales, prices, stock and plans flow in from the accounting system every day, matched by ID.	LIVE
Customer ordering	Partner endpoints let customers' own systems order from KAD directly (pilot with one customer).	PILOT
Brand-owner reports	Anonymised coverage, presence and sell-out reports for Castrol.	PROPOSED
