KAD OS

powered by Castrol

The operating system for a modern Castrol distributor.

Introducing the app · KAD Motors, Armenia · November 2026

Demo data

WHAT IS KAD OS?

One app for everyone in a Castrol distributor

Field sales, customers, orders, credit, cash, the team and management reports in one system, with AI that keeps everyone on plan.

Sales reps

Visit, check in, take orders and payments

Sales director

Plans routes, approves prices and credit

Warehouse

Sees confirmed orders to pack and ship

Accountant

Invoices, payments and cash

CEO

Live dashboards and an evening report

Opens from a link on any iPhone, Android phone or PC. No app store. Works without signal.

PROBLEMS IT SOLVES

Six everyday problems, and how KAD OS solves each one

Visits nobody can check

GPS check-in with a photo at the outlet

Orders by phone, wrong prices

Orders in the app at fixed price lists

Overdue debt found too late

Debt per invoice and automatic collection tasks

No view of the shelf

A Castrol shelf check at every visit

Reports that take days

Live dashboards and an evening report

Problems noticed too late

An AI deputy director gives and chases tasks

HOW IT WORKS

How KAD OS works, in four simple steps

1. The team works in the app

Visits, orders and payments are recorded where they happen

2. KAD OS checks the rules

Prices, discounts, credit and stock, at once

3. AI spots problems

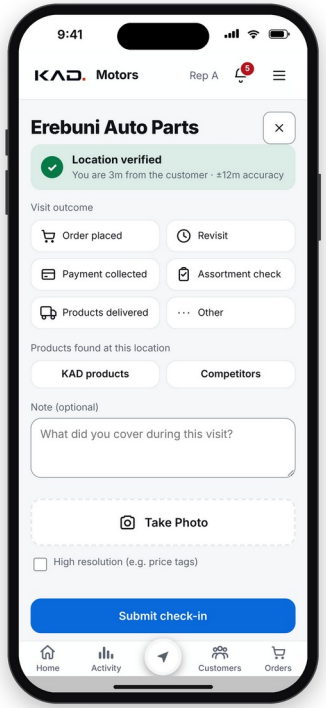

Gives a task to the right person, with a deadline

4. Management sees it live

Dashboards, reports and an evening summary

One cloud system. Customers, products, orders, money and tasks live in one secure database. The accounting system is connected through the integration API, so nobody types anything twice.

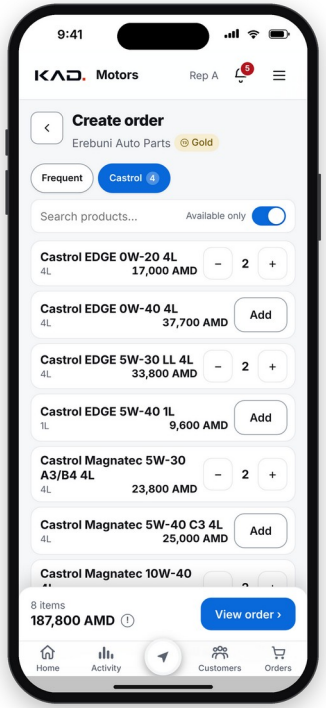

From the shop counter to the CEO's phone, in one flow

09:40

Rep checks in

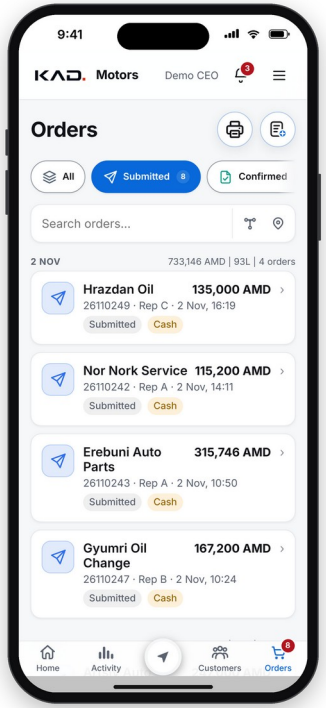

GPS + photo at the outlet

09:52

Takes the order

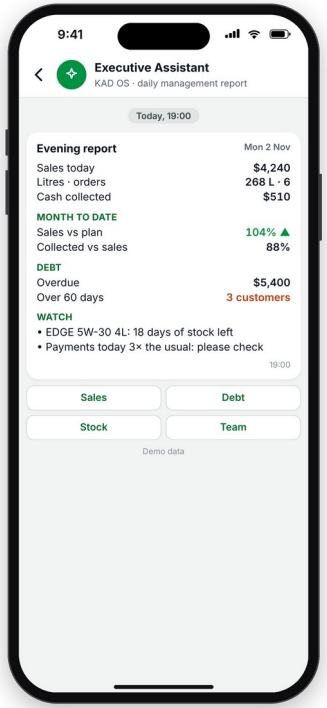

Right prices, usual basket

09:53

Manager sees it live

Approves in one tap

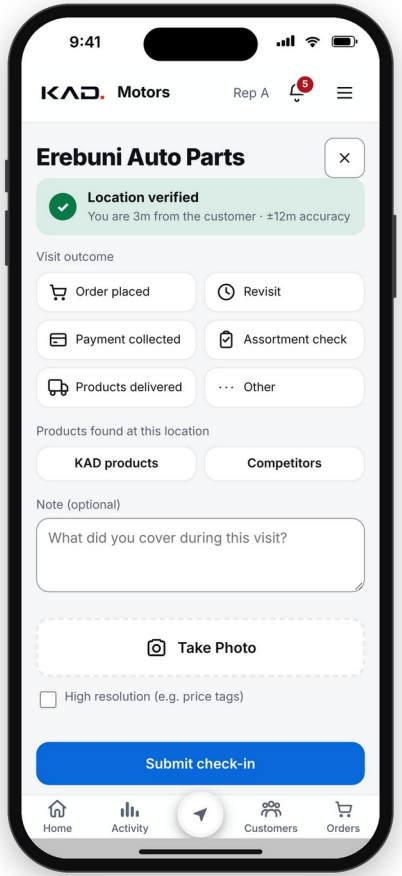

19:00

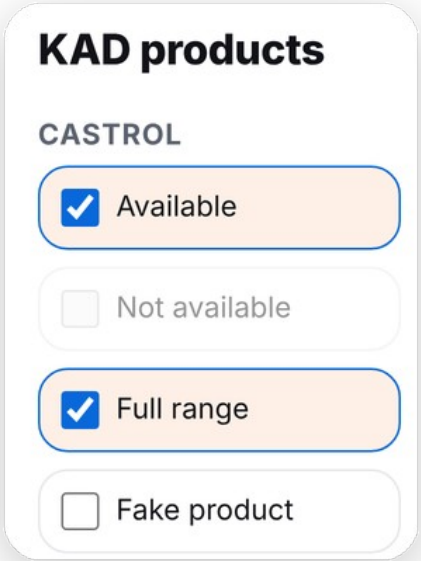

CEO gets the report

Sales, cash, debt, risks

VISITS IN THE FIELD

Every visit is checked and recorded

Demo data

GPS check-in

Only within 300 m of the outlet (set by management)

Photo proof

A photo and the visit outcome are saved

Shelf check

Castrol on the shelf, full range, fake products, competitors

Open tasks at the visit

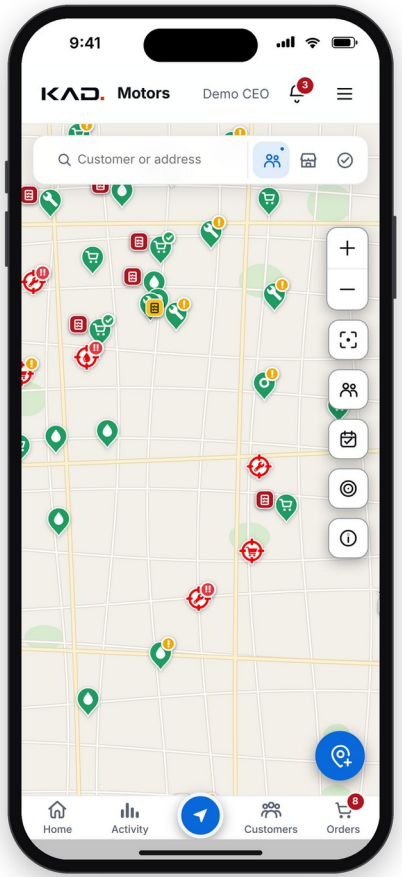

The rep sees what to do at this customer

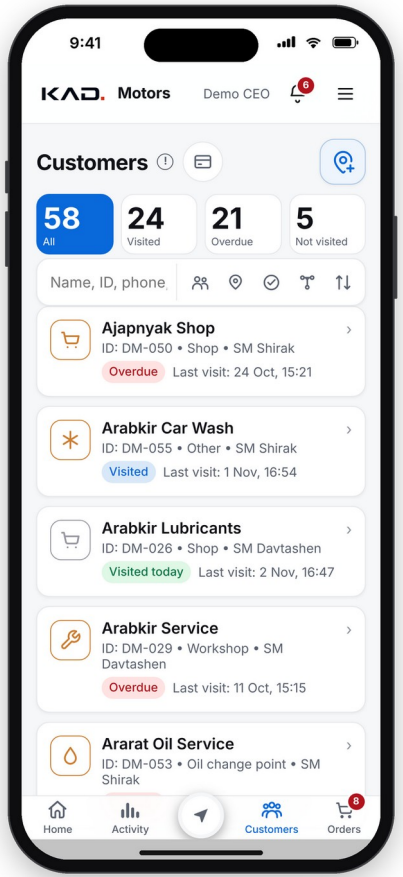

Works without signal

The visit is saved and sent later

CUSTOMERS & MAP

Every customer, on a map, with everything about them

Demo data

Customer map

Every outlet, coloured by visit status

Customer card

Contacts, orders, debt, visits, tasks

Visit plans and routes

Weekly routes for every rep, planned automatically

New customers from the map

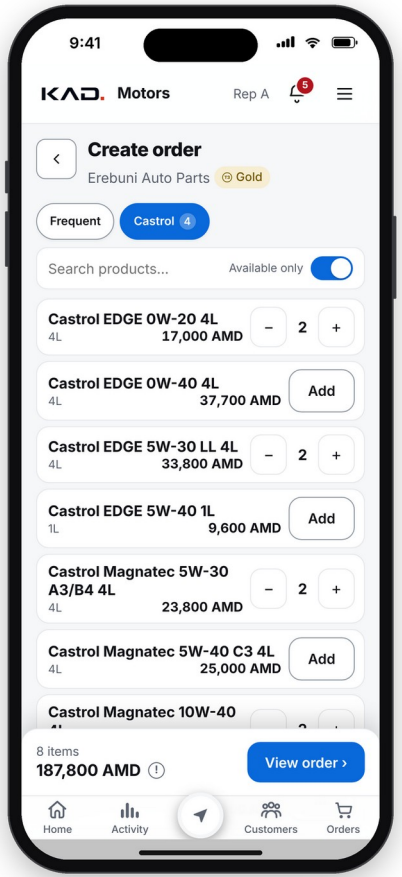

Add a shop where you stand

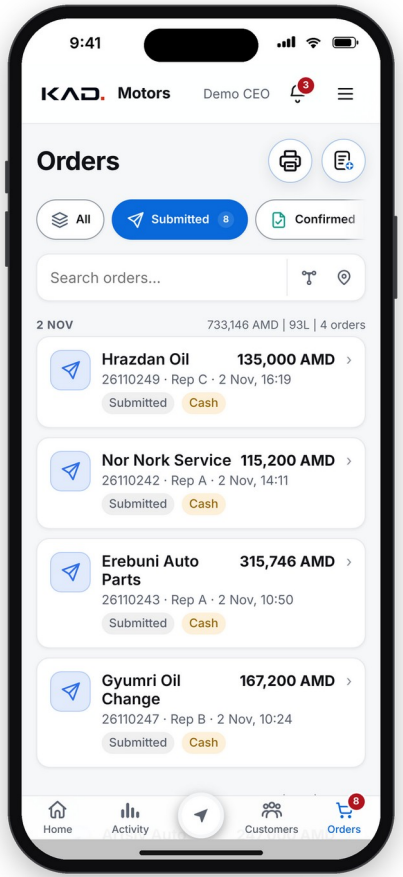

Overdue visits

Customers not visited on time are flagged

ORDERS

Orders in a few taps, at the right price

Demo data

Fast ordering

Usual basket, repeat last order, search

Price lists by customer level

Bronze, Silver, Gold; reps never type prices

Discount rules

Over 3% needs approval; below cost, the CEO

Live order status

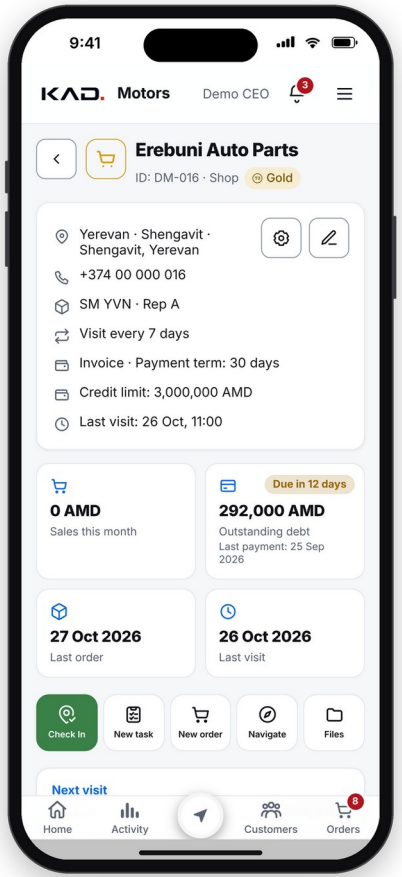

Draft, submitted, confirmed, packed, delivered

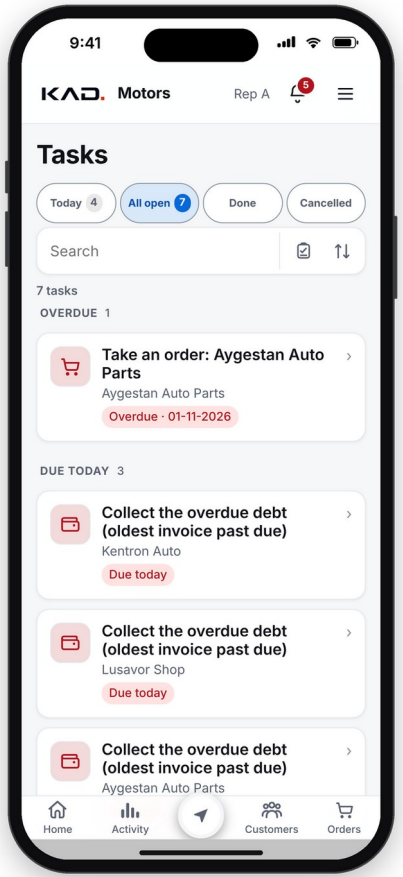

Printable order form

A delivery act for the customer to sign

CREDIT, DEBT & CASH

Credit and cash under control, without chasing

Demo data

Credit limits

Over the limit, the order waits for approval

Debt per invoice

Every unpaid invoice with its due date

Collection tasks

Overdue debt becomes a task with a promise date

Payments at the visit

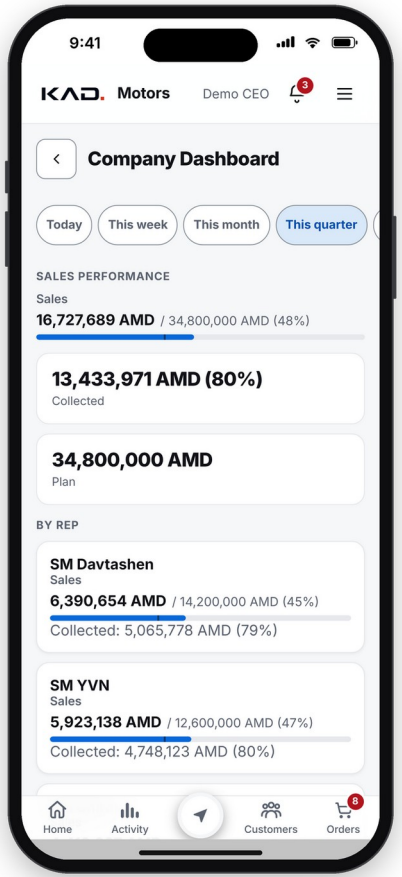

Recorded and tracked to the accountant

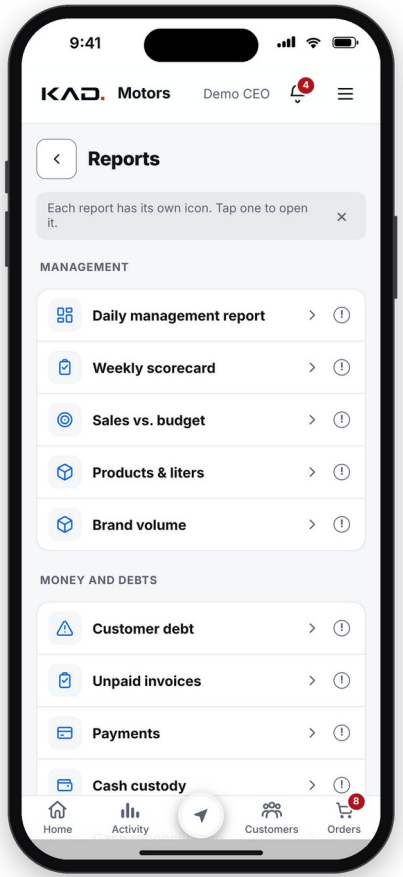

Debt statement

A one-page PDF for the customer

MANAGEMENT

Management sees the business live

Demo data

Live dashboard

Sales against plan, by rep and channel

Targets and bonuses

Each rep sees plan, progress and points

Team scorecards

Visits, orders and payments per rep, each week

Reports

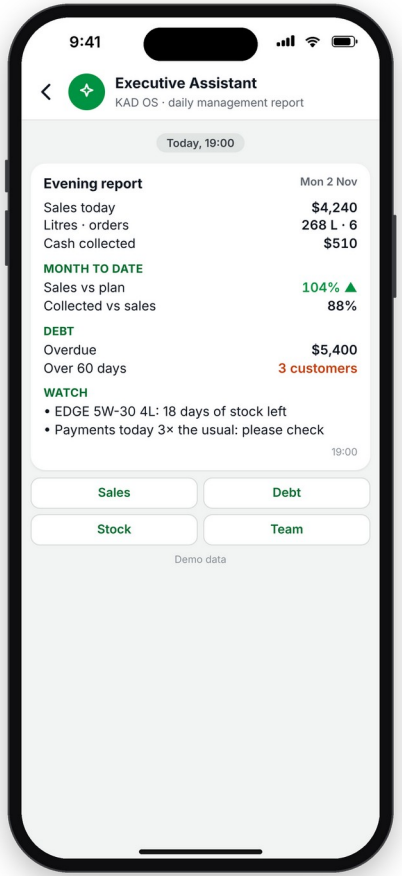

Money and debt, sales and litres, team, stock

Right data for each role

A rep sees only own customers

EXECUTIVE ASSISTANT

An evening report on the CEO's phone, every day

Demo data

Sales and volume

Today and month to date, against plan

Cash and debt

Collected today, overdue, oldest debts

Stock risks

Products about to run out

Unusual numbers

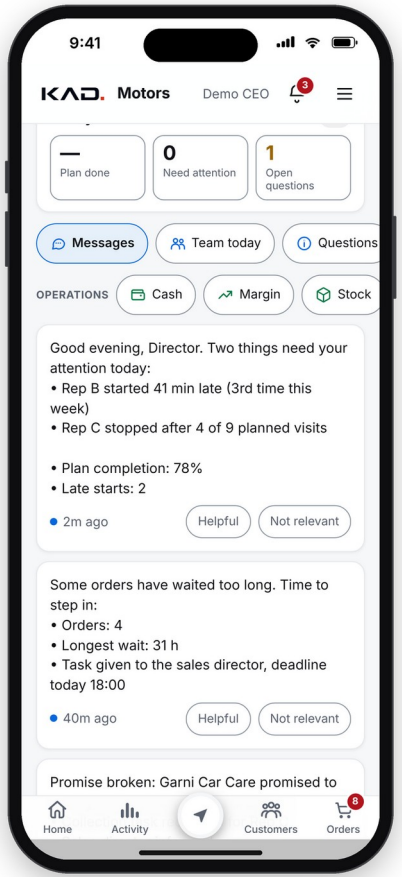

Anything far from normal is flagged

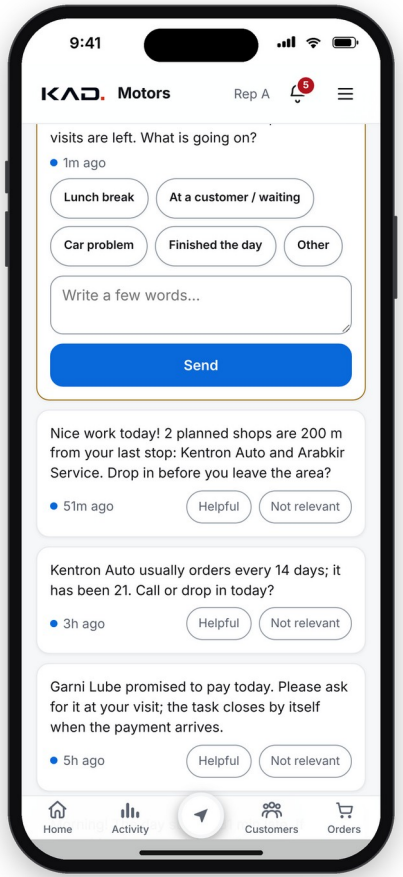

Weekly and monthly

Longer summaries at the end of each period

AI DEPUTY DIRECTOR

An AI deputy director keeps everyone on plan

Demo data

Watches the working day

Late starts, missed visits, long office stays

Keeps visits on route

Reminds reps about planned shops nearby

Chases money

Overdue debt, down payments, broken promises

Gives and closes tasks

Right person, deadline; closes when done

Escalates only what slips

Management hears only what needs them

AI AND AUTOMATION

AI and automatic calculations do the routine work

AI analyst: ask your data

Management asks a question in plain words and gets an answer with numbers:

“Which customers bought less EDGE this quarter, and who is their rep?”

Customers and staff are hidden behind codes

Read-only, every question logged

CALCULATED AUTOMATICALLY

- Landing cost of every product
- True cost at the selling price, for each discount
- Debt age of every invoice
- Suggested credit limit per customer
- Each customer's usual basket and order rhythm
- Days of stock left and what to reorder
- Rep working hours and weekly scorecards
- Fuel allowance from the real GPS route

BUILT FOR REAL FIELD WORK

Works on any phone, fast, offline and secure

Any phone or PC

Opens from a link; no app store

Works offline

Visits and orders wait on the phone and send later

Fast on cheap phones

Speed is tested on a slow phone

Role-based access

Everyone sees only what their role allows

Secure

Encrypted connection, protected logins, audit trail

Data stays with us

Our data lives in our own cloud system

BUILT AND ADOPTED

Live in 2 days, adopted in the first month

2 days

from first line of code to the first live version

22 Aug → 24 Aug 2026

1st month

the whole field team working in the app

September 2026, the first full month after launch

10 weeks

to the complete system shown today

763 improvements, delivered every week

22 Aug
Work starts

24 Aug
First version live

September
Whole field team in the app

Today
Complete system, weekly updates

COMING NEXT

Next: delivery, warehouse and more AI

LAUNCHING NEXT

Delivery & Driver

- Delivery routes for drivers
- Arrival detected automatically
- Customer signs on the phone

LAUNCHING NEXT

Warehouse

- Picking and packing in the app
- Live stock behind every order
- Stock counts, even offline

LAUNCHING NEXT

AI expert agents

- Sales, finance and stock specialists
- Led by the AI deputy director
- Each finds, assigns and checks

KAD OS

powered by Castrol
